TO THE ELDERS OF THE CHURCHES

RE: Announcement of the Fall 2021 Middle-age Full-time Training in Anaheim

After a long recess of over a year due to the global pandemic, we are looking to the Lord for a new beginning this fall at the Middle-age Training, in the spirit of a fresh consecration and a renewed sense of the Lord's imminent return. We pray that the Lord will stir in the hearts of many saints to rise up to redeem the years that the locusts have eaten (Joel 2:25) and seize the opportunity to be trained. In the Middle-age Training, saints of different races, nationalities, and languages, come together to be perfected in an atmosphere of blending to usher in the reality of the Body of Christ for the one new man.

The FTMA-MA is a one-year program, and all classes are designed with a full year in view in two 15-week terms. The coming term of the Middle-age Training will begin on August 30, 2021 and will conclude on December 11, 2021. The curriculum and schedule are designed to meet the specific needs of this age group. The classes are given in English, Chinese, Korean and Spanish languages. We hope that many saints in the Lord's recovery, between the ages of 35 and 65, will seize this opportunity to be perfected. Please refer to the attached information sheets for details. All applications must be received by the Middle-age Training office no later than August 10, 2021.

Sincerely,

Living Stream Ministry

Overcoats and sweaters should be in dark solid navy blue, gray or black with no design or monogram. Overcoat should not be worn inside the classroom.
3. The training will provide all linens, such as pillow, bed sheets, blankets, etc. Please bring your personal items, such as towels, shampoo, etc.

Lodging: Training-arranged housing will be provided to single brothers or sisters when requested. Married couples without children will be lodged together in training-arranged housing if both are trainees. Couples with children may also apply provided they are able to take care of their own housing needs and living costs. Southern California trainees may stay at home and commute.

Transportation: Trainees are encouraged to provide their own vehicle.

Medical Requirements: Mandatory medical requirements for trainees registered for one month or longer:

1. Major medical or valid travel insurance, e.g., copy of insurance card or insurance certificate, which provides coverage while trainees are in Anaheim, must be in place before they arrive for the first day of the training.
2. Health Questionnaire must be completed and submitted along with the application (download the form at www.fttamidage.org).
3. All incoming trainees must submit evidence of tuberculosis (TB) screening.

Although tuberculosis screening need not be completed before the application is submitted, it must be completed before arrival in Anaheim. Trainees are not allowed to participate in the training, including meals or housing, prior to completion of tuberculosis screening.

In most cases, TB screening is done by a skin test (PPD) performed within the last 6 months before the start of the Training. However, in the event that your TB skin test returns positive, a radiologist's report in English of a chest X-ray done after the PPD must

be submitted. The skin test requires two visits to a health care provider, 48-72 hours apart, and obtaining a chest x-ray report normally requires at least a week. The applicant should allow for unforeseen delays.

If the PPD test was positive in the past, the PPD should not be repeated. In this case, a chest x-ray done within the last 12 months before the start of the training is sufficient.

If the TB screening requirement is fulfilled by chest x-ray, the report must be in English and signed by a radiologist. Note that a statement from a personal physician that the chest x-ray was normal is not sufficient. In addition, you must send the chest x-ray in electronic format to midage@ftta.org, or bring the chest X-ray, preferably in electronic format, to your medical interview on the first day of the Training.

An alternate method of screening is by blood test. One advantage of the blood test is that it might turn out normal even if the PPD was positive in the past, which would spare the need for a chest x-ray. However, the blood test is more expensive and is not as widely used as the PPD.

There are two situations in which no skin test, x-ray or blood test is required. One is if the individual has previously had TB, has completed treatment, and is currently without symptoms of cough, fatigue, night sweats or weight loss. The other is if the individual has completed a course of antibiotic prophylaxis for TB (this is usually 6-9 months in duration). In either case, documentation of treatment must be submitted in English.

Applicants are strongly recommended to have immunization against tetanus, hepatitis A and B, influenza. For those who are over 50 years old, the Zoster (shingles) vaccine is also recommended. The pneumococcal vaccine is recommended for applicants over 65 in good health condition.

It is also recommended that applicants over fifty years of age to consult a physician to undergo examination and other evaluation as deemed necessary to assure readiness to undertake an intensive year-long training program.
